

Rubén Pezuela García

Full Stack Developer (Junior) — Automation with n8n

Guadalajara, Spain · +34 618 856 782 · ruben.pezuelagarcia@gmail.com

GitHub: github.com/RubyPG **Portfolio:** rubypg.github.io/Portfolio-Web

Junior Full Stack profile focused on product and automation: Astro/TypeScript, Supabase/PostgreSQL and n8n (webhooks, validation and routing). Web/desktop products with billing and automation; RAG chatbots with n8n.

TECHNOLOGIES

Frontend:

Astro, TypeScript, React (selectively), Tailwind CSS, SSR, REST

Backend/Data:

Supabase, PostgreSQL, SQL, RLS, Realtime, Node.js, Firebase

Automation/Infra:

n8n, RAG, Webhooks, Docker Compose, Traefik, Grafana, Amazon SES, GitHub Actions

Desktop:

Kotlin, Compose Multiplatform (JVM), Java 21, Maven, Gradle

ABOUT ME

- Proactive and solution-oriented; quick learner.
- Maintainable code, clear documentation and iterative deliveries.
- Consistent, improvement-focused mindset.

EXPERIENCE (TECH)

iCreate Group — Freelancer

iLead CRM (Lead-to-Cash):

- Lead-to-Cash desktop CRM: lead→customer→invoice→collection with operational UX (table, filters, inline editing, autosave).
- Supabase/PostgreSQL as source of truth + logical multi-tenant setup and runtime configuration (client.json + env vars).
- Stripe Invoicing + invoice state synchronization via n8n webhooks, with consistency rules.
- KPIs via SQL views + operational metrics in Grafana (pipeline observability).

Other contributions:

- Automation platform (n8n-hub + Supabase + Traefik/Docker) for multi-client workflows.
- Transactional email with Amazon SES (SPF/DKIM/DMARC) integrated from workflows.
- iServices CRM (Astro SSR + Supabase): Auth, RLS, Realtime and modular architecture as a product for iCreate Group.
- Currently building the HR, fleet and routing system (TMS) for Camel Cargo, a logistics company.
- RAG chatbots with n8n for automation and support.

Higuer S.L.U — Internship

- Desktop application development using Java.
- Image and pattern recognition project with Java and ONNX Runtime.
- Data analysis focused on Meta Ads campaigns.

PREVIOUS EXPERIENCE

2026 · GXO 3 — Warehouse operative

- Picking and VAS.

LQS — Refurbish and software (Amazon and InPost lockers)

- Software/hardware issue resolution and physical maintenance of Amazon and InPost locker equipment.

Trillo Nuclear Power Plant — Nuclear instrumentation

- Installation, calibration and maintenance of nuclear equipment and telecommunication systems.

KiK Guadalajara — Store associate

- Daily cash custody, stock control and replenishment under protocols and visual standards.

XPO — Logistics (Picking and put-away)

- Picking, stock placement and support for inventory/operations.

S.D.C — Telecommunications (Installer)

- Antenna installation, router setup and network maintenance; customer support.

EDUCATION

- Higher Technician in DAM (Multiplatform Application Development).
- Intermediate Vocational Degree: Telecommunications Installation.
- Compulsory Secondary Education (ESO).

LANGUAGES

- English: B2 (Trinity Grade 10 — with merit).
- Spanish: Native.

OTHER

- Solid web development knowledge across frontend, SSR, APIs and databases.
- Remote work and flexible hourly availability.
- Driving license and own vehicle.
- Forklift license.
- Available to travel (Spain/Ireland).
